

Darcy Aston Environmental Advocacy Scholarship 2023-24 APPLICATION

The Environmental Education Coalition of Napa County (EECNC) connects members of our community with the local environment. Through a network of local organizations, the coalition provides resources and support to promote sustainable living and to cultivate an appreciation of the natural world.

PURPOSE

This scholarship is in honor of Darcy Lynn Aston. Darcy received a degree in Environmental Studies from UC Santa Barbara, and worked with EECNC, Napa Sanitation District, and agencies across California to provide meaningful environmental education for thousands of students. Darcy was a tireless advocate for the conservation of nature, water, and sustainability.

This scholarship is intended for graduating high school students who intend to pursue studies in the natural sciences including but not limited to: conservation biology, wildlife biology, environmental science, natural resource management, ecology, sustainability, energy, waste, recycling, water, air, policy, agriculture, or a similar environmental field.

- Four applicants will be selected to receive \$1,000 each to support their pursuit of a sustainable environmental future.
- Applicant must be a graduating senior at a Napa County public or private high school.
- Applicant must indicate the post-secondary educational institution (college/university/trade school) that they plan to attend. The scholarship check will be issued upon proof of enrollment or registration at that institution.
- Priority consideration will be given to students who have participated in volunteer activities related to sustainability, protecting people, land, air, water and wildlife, and environmental conservation locally.

EECNC proudly offers four \$1,000 scholarships to Napa County students who embody Darcy's legacy of celebration and protection of the environment and support a sustainable environmental future.

This scholarship is intended for graduating high school students who intend to pursue studies in the natural sciences including but not limited to: conservation biology, wildlife biology, environmental science, natural resource management, ecology, sustainability, energy, waste, recycling, water, air, policy, agriculture, or a similar environmental field.
